

BIM Manager

Location: Delhi

Full time, permanent position

The role

Our New Delhi studio is currently looking for an experienced BIM Manager to join large scale commercial project. You will be a key member of several project teams, assisting in the development and implementation of BIM strategies, and maintaining good model health, ensuring excellent coordination, and supporting team members adopt and maintain best BIM practices.

Embracing an interdisciplinary design ethos, you will collaborate with clients, Revit specialists, design professionals, and project participants at all levels to implement fully integrated BIM coordination, documentation, and quality management.

About you

As a BIM Manager, you will have excellent communication and collaborative skills appropriate to the delivery of high profile sports and mixed used projects. You should have at least 5-7 years' experience working within a similar role.

As a BIM Manager you will be using Autodesk software (Revit & Navisworks), with clear understanding of BIM processes and how they are applied within integrated project delivery for large-scale commercial projects, sports, mixed-use, high-rise residential or transport projects.

Key responsibilities:

- Prepare and implement BIM Execution Plans, strategies, protocols, and processes at a project level.
- Input into BIM strategies and policies, studio and practice wide.
- Setup of complex project models, including team briefings and inductions.
- Manage the Common Data Environment and facilitate model sharing between parties.
- Undertake complex content creation, in collaboration with other designers.
- Support project teams with advice, troubleshooting, mentoring, and training.
- Carry out clash detection and more general model health checks.
- Identify and help resolve issues that impact scope, programme, quality or other commercial matters.
- Stay up to date with best BIM practice and implement these within your teams.
- Create deployment strategies for the BIM implementation effort.
- Support the BIM technology needs of offices at different locations.
-

Experience & Skills:

- At least 5-7 years' experience in a similar role.

- B.Arch/B.Tech/Masters in relevant fields
- Project experience at RIBA Stages 3-5
- Revit, Navisworks, Dynamo and other BIM software', Knowledge of Rhino, Lumion and Grasshopper will be considered as added advantage.
- Knowledge and understanding of relevant BIM protocols and standards.

BDP offers

BDP offers an environment which encourages creativity, teamwork and continued growth as a professional.
